Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Claim 1-7 and 9-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10, received July 10, 2001.

### *Information Disclosure Statement*

2. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered. See page 45, for example of the instant specification.

### *Specification*

3. The disclosure is objected to because of the following informalities: *For example*, the first full paragraph on page 58 is grammatically confusing. Appropriate correction is required.
4. The use of the trademark "Windows 98", in line 15 on page 18; "Walkman", in line 22 on page 17 and "MS-Word or Excel" in line 24 on page 17, *for example*, has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Art Unit: 2652

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

5. *Again, the lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.*

#### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 8 and 12-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ishii et al (US 5,265,083).

#### ***Response to Arguments***

8. Applicant's arguments filed January 2, 2002 have been fully considered but they are not persuasive. Applicant asserts on page 5 in the first full paragraph the following:

Ishii et al. does not teach or reasonably suggest a multi-purpose information processing apparatus having first and second bodies, wherein the first body has an information input section and an information recording or reproducing section arranged integrally, and an opening/closing mechanism section arranged on a surface different from the

Art Unit: 2652

information input section, and wherein the second body has the information display section, as required by Claim 8.

First of all, it should be noted that the term integral, as defined by the courts, is not necessarily restricted to a one-piece article or unitary article. Integral embraces constructions that are merely connected. Integral, as defined by *Webster's New Riverside University Dictionary*, for example, means "Essential for completeness"; "Having everything required: Entire" or "A complete unit: Whole". As required by claim 8, Ishii et al does disclose the fact that "the first body has an information input section and an information recording or reproducing section arranged integrally".

Secondly, if the surface of the information input section was not a surface different from the opening/closing mechanism section, as interpreted by applicants, the two sections would be superimposed one on the other rendering it impossible to utilize the information input section.

Thirdly, Ishii et al shows information display section 14, as required by claim 8. Therefore, contrary to applicant's assertion, Ishii et al does disclose each and every element required by claim 8.

### ***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2652

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
